SUMMARY

I am a skilled Software Engineer with 1 year of experience in designing and developing scalable web applications. Proficient in building complex systems using modern JavaScript technologies such as React, NextJS, ExpressJS and NodeJS. With experience in creating efficient, user-focused solutions that modernize processes and deliver high performance applications to the clients.

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER

TECHLOGIXIT SERVICES (INDIA)   NOV 2023 – NOV 2024

- Developed a Saas-based **HRMS** product using NextJs, NodeJS and PostgresSQL with prisma which replaced outdated system with improved speed and added some more features like overtime attendance and leave management.
- This application increased efficiency and user adoption internally, and also generated sales by selling it to other local businesses.
- Collaborated with a team to develop a **Freight Audit Processing** for a client, handling complex business and improving business efficiency.
- Contributed to frontend and backend development creating RESTFUL APIs with ExpressJS. Also played a key role in designing scalable and efficient database structure to support seamless operations and replaced the legacy system.
